THERM-IC.COM

KEEP WARM!

KEEP WARM!

Therm-ic has a long history, which began with the invention of heating systems for ski boots. Building on the developments and patented technologies of the last 20 years, our range of products now includes a variety of high-quality solutions in the field of portable heating systems, which are proved to provide warmth.

Therm-ic's products have a variety of benefits, from enhancing human well-being, to significantly increasing an athlete's performance. Moreover, they have a preventive effect as they reduce the risk of injury.

Especially when participating in outdoor winter activities, extreme cold and extreme weather conditions can cause severe discomfort. In the worst case, these extreme circumstances may lead to injuries, frostbites, or cold-related diseases. Our mission is to develop technologies for portable and easy-to-handle heating systems in order to protect the entire body.

With the new Therm-ic brand appearance we have also renewed and widened the collection. The product range includes heatable gloves, soles, socks, liners as well as drying and refreshing systems for the daily shoe care. New are non-electronic warming solutions for everyday life, basing on long-term research in insulation and natural heat development. Thus, Therm-ic, the inventor of heating systems for ski boots has now become the warmth specialist for winter sports enthusiasts and everyone who loves the cold season!

THERMO REGULATION

We like to be in good physical shape to get the most out of our outdoor activities and we particularly dread being cold. We all love the feel-good, energising effects of heat which is also a source of energy. To cater to this desire, we've taken on a "HEAT CHALLENGE" with THERM-IC.

To keep our customers warm in a comfortable and healthy environment, we've focused our efforts on the following process: THERM-IC THERMO TRANSFER TECHNOLOGY.

KEEP WARM TO PROTECT YOUR STRENGTH AND WELL-BEING.

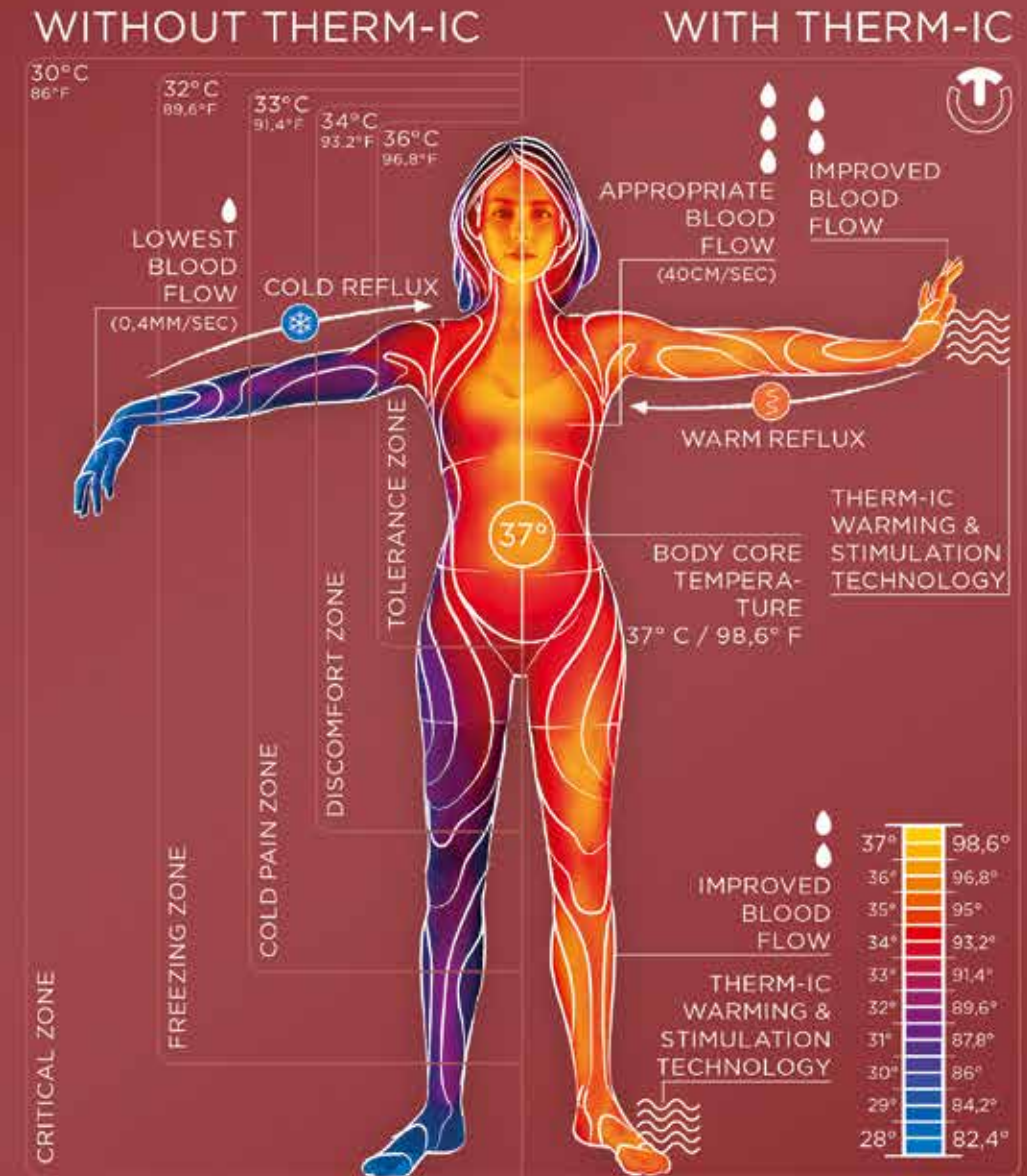

THERMOREGULATION

Our body works best at 37° C, however very often the temperature in the extremities is much lower, at around 30° C. There are various zones of feeling:

- 37° WELL-BEING ZONE
- 36° TOLERANCE ZONE
- 34° DISCOMFORT ZONE
- 33° COLD PAIN ZONE
- 32° FREEZING ZONE
- 30° CRITICAL ZONE

The challenge for Therm-ic products is to keep your entire body at 37°, thus saving your energy for your sporting activities.

BALANCED THERMO REGULATION COMPARISON

The 'THERM-IC THERMO TRANSFER TECHNOLOGY' process increases the temperature in these critical areas, thus protecting the rest of the body from the cold. Suffer from the cold, or keep warm and enjoy a fantastic day in the fresh air? The choice is yours!

THERM-IC TECHNOLOGIES

THERMO Insulation

Thermal Insulation technology is the promise of comfortable, insulated products, all designed to retain body heat and create a barrier against the cold. An essential component of this technology is the choice of materials which are soft, comfortable, warm and insulating for total well-being during your outdoor activities.

WARMER Ready

Therm-ic has created the smallest and handiest warmer on the market for easy insertion into products... Providing warmth to the tips of your fingers and toes! These innovative products come with a special pouch to hold the warmer. Browse the Warmer Ready mittens and socks. Available in a range of sizes and colours, there's something for the whole family.

THERM-IC TECHNOLOGIES

POWERED Heat

Premium products with up to 29 hours of heat are now a reality with the new range of heated products. Our ever-expanding range includes socks, gloves and insoles. The new technology consists of a single button to adjust the heat setting, and a new USB charger for a longer life.

CARE System

Care System technology products are designed to care for your equipment following your sporting activities. In just a few hours, they'll dry and sanitise your shoes and gloves. Essential accessories to start the day with your best foot forward!

THERM-IC BLUETOOTH

Treat yourself to a complete solution and connect your Therm-ic products to your phone!

With our batteries' new Bluetooth function and the Therm-ic mobile app, you can consult and adjust the heat setting for your socks, insoles and gloves in real time using your smartphone. You can also link your product's performance to your activity, i.e. skiing, hiking, trail activities, running, mountaineering, trekking, etc.

Share Therm-ic with your friends and family! The app allows you to add and manage up to four user profiles and four Therm-ic heating products. The Bluetooth function is wonderfully convenient and makes your batteries easier to use.

- Free app
- Suitable for use with Android and iOS
- Works with Therm-ic S-Pack and C-Pack Bluetooth batteries

THERM-IC

INSIDE

Therm-ic Inside is the official partner of major sports brands. Therm-ic has worked alongside manufacturers of sporting goods and other major brands for several years on the integration of heating systems into their products at the early stages of the production chain. These brands have thus drawn on Therm-ic know-how and technology to boost their customers' well-being.

SOCKS

MUSCLE POWER AND ENDURANCE COMPARISON

WITHOUT THERM-IC, 75 % OF MUSCLE POWER AND ENDURANCE IS LOST

75 % of our muscle mass falls victim to the cold. When we begin to feel cold, the pain signal is sent to the brain and more than 90 % of available energy is used to warm up the affected muscles. The result is shivering and reduced muscle power and endurance.

THERM-IC THERMO TRANSFER TECHNOLOGY RESTORES MUSCLE POWER AND ENDURANCE

The THERM-IC products instantly deliver the required heat to critical areas. Muscle power is restored, blood flow stimulated and shivering ceases. With Therm-ic, you'll be back at full physical and muscular strength with a reduced risk of injury.

INSULATING SOCKS

Warm and soft fleece socks for total comfort and everyday use in cold weather.

Their fleece-lined bouclette fabric keeps the warm air close to the skin, effectively insulating against the cold all day long.

Quick drying with 90 % Polyamide fabric.

The perfect sock for keeping your feet warm during your cold-weather activities!

Materials: Microlon (micro nylon) 90%, Polyester 8%, Elastane 2%

- Soft and warm socks
- Quick drying
- For everyday use during cold weather and for a variety of activities
- Wide and comfortable ribbed cuff
- Ankle and heel reinforcements
- Available in high and medium versions
- Available in four colours: black, white, black flake and white flake

ERGONOMIC WARMER

**The Custom Warmers**

are smaller and more handy for easy insertion and improved hold inside the pouch of your Warmer Ready Socks or Warmer Ready Mittens. Non-toxic, odourless and ecological, they can be used for all your sports or leisure activities. When the packaging is opened and the warmer comes into contact with the air, it reacts and begins to heat up in just a few minutes. They work using completely natural ingredients (water, salt and activated carbon) meaning you can throw them out with your household waste.

Have a fantastic day of skiing!

The warmers provide up to 4 hours of heat.

- Warmer dimensions: 60 x 80 mm
- Up to 4 hours of heat
- Handy shape
- Odourless and ecological with completely natural components
- Reversible and non-sticky
- Single use

GLOVES

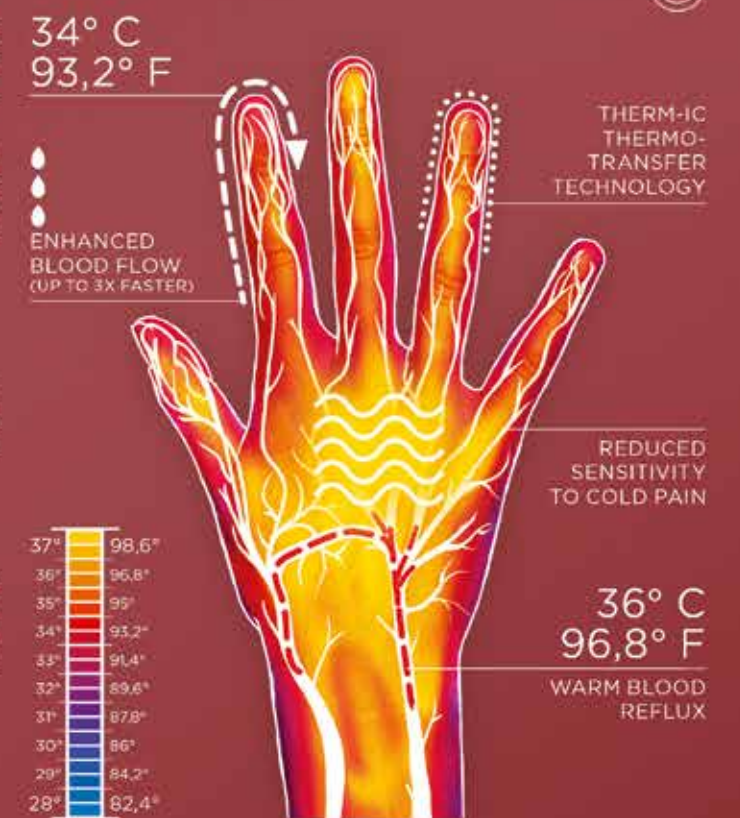

HANDS CHALLENGE COMPARISON

By nature, the fingers receive less blood than the rest of the body. Fingers are slim, particularly in women, with virtually no fat or muscle and a blood flow speed 1000 times slower than at the centre of the body. Fingers are much more sensitive so when exposed to the cold without protection or insulation, you'll soon feel pain.

WITHOUT THERM-IC

WITH THERM-IC

THERM-IC THERMO TRANSFER TECHNOLOGY: KEEPS THE FINGERS WARM.

Therm-ic gives you what nature can't. Therm-ic products will gently warm your fingers, restoring the necessary blood flow for ultimate sensation and well-being.

WARMER *READY* MITTENS**Mittens to quickly and easily warm your hands.**

The Warmer Ready mittens come with a zipped pocket at the side. This allows the wearer to incorporate their warmers for good hold and a better distribution of heat.

The pocket is made with heat-reflective fabric at the top to keep the heat in the glove, and a thin fabric at the bottom for maximum heat conduction. The zip also keeps the pocket airtight.

For use with the handy Therm-ic Custom Warmers.

Available in adult and kid sizes.

- Durable Water Repellent (DWR) treatment
- Insulating hyperloft palm: insulating hydrophobic material
- Handy pouch to hold the warmer in place.
- Simple and easy to use
- Up to 4 hours of heat
- Optimised distribution of heat
- Zip fastening on the airtight pocket
- Available in 3 colours: Blue / Lime / Pink
- One pair of free warmers

INSOLES

COMFORT ZONE

It is important to take care of our hands and feet in all circumstances. When the body's endogenous insulation is insufficient, external insulation is necessary for a balanced body temperature and well-being. The aim is to keep your body in the ideal comfort zone, i.e. a temperature of 36° C.

With this in mind, Therm-ic has devised and created an insulating insole material which fulfils the desired functions by stimulating blood flow and increasing body temperature. The Therm-ic insole comes with three insulating covers consisting of a heat-reflective aluminium layer to transmit body heat, and memory foam in contact with the foot for a comfortable feel throughout the day. Insoles are finished off with an exclusive rubber-based material for grip and stability in your shoes.

Therm-ic channels it's innovation and service into your well-being.

INSULATING INSOLES

INSULATION AIR

T24-0100-102

XS X M L XL XXL

The Insulation Air insoles offer lasting protection against the cold with their three-layer insulation concept to keep your feet warm. The memory foam creates the insulating layer of air, which is essential to all insulation. The soles also contain a rubber-based material to guarantee stability in the soles of your shoes.

INSULATION 3D

T24-0100-103

XS X M L XL XXL

Warm and insulating anatomical insoles. Designed with high-quality materials, they offer the utmost comfort and good stability in the footwear. The 3D shape supports the arch and improves blood flow to keep the feet warm. Specially designed for winter sports.

HEATED INSOLES

HEAT FLAT

T44-0100-001

Very thin heated insole that is easy to cut in order to adapt to your shoe size and boots.

High-quality heating elements to keep the foot at an ideal temperature.

Slips easily into snow and ski boots.

- Suitable for use with Therm-ic C-Pack battery range only.

HEAT 3D

T44-0100-003

XS M L XL XXL

Heated insole with 3D anatomical shape for perfect hold. Stable support for a better distribution of pressure. High-quality heating elements to keep feet at an ideal temperature. Outer cable for perfect positioning in any footwear. EVA foam structure.

- Suitable for use with Therm-ic C-Pack battery range only.

HEATED INSOLES

HEAT KIT

T44-0100-002

Heating elements to integrate into your insoles. The new ultra-thin heating elements integrate perfectly into any type of insole.

Self-adhesive textile lining to cover the heating element and guarantee utmost comfort.

- Suitable for use with Therm-ic C-Pack battery range only.

POWERED  Heat**C-PACK BATTERIES**

C-Pack batteries are suitable for use with the Therm-ic heated insoles, providing up to 29 hours of heat.

**C-PACK 1300**

T41-0101-100

The best value for money, this C-Pack 1300 battery pack comes with three heat settings to help you keep your feet warm all day long.

- Up to 22 hours of heat
- Comes with a single control button
- Pack comes with a USB charger
- Wall charger not supplied
- Suitable for use with Therm-ic Insoles Heat Flat, Heat 3D and Heat Kit range only.

**C-PACK 1300 B**

T41-0101-200

With the C-Pack 1300 Bluetooth battery, you can control the strength of your heat remotely using your smartphone.

- Up to 22 hours of heat
- Comes with a single control button
- Pack comes with a USB charger
- Wall charger not supplied
- Suitable for use with Therm-ic Insoles Heat Flat, Heat 3D and Heat Kit range only.

**C-PACK 1700 B**

T41-0101-300

The C-Pack 1700 B batteries are the most effective in the range and thanks to the Bluetooth function you will be able to control the intensity of your heat remotely.

- Up to 29 hours of heat
- Comes with a single control button
- Pack comes with a USB charger
- Wall charger not supplied
- Suitable for use with Therm-ic Insoles Heat Flat, Heat 3D and Heat Kit range only.

POWERED  Heat**HEATED INSOLE SET**

The Therm-ic Insole Set includes a pair of high-tech insoles and one pair of Therm-ic batteries.

SKI

POWERLINER

T02-0400-001
Black/orange

23.5 24.5 25.5 26.5 27.5 28.5 29.5

The PowerLiner is ideal for most ski boot shells. This heated liner fits perfectly within your boot shell. The heat controls sit directly on the tongue for easy access, even when skiing. It has never been easier to integrate a heating element into a ski boot.

- Optimised fit for most ski boot shells
- Easily accessible heat controls on the tongue
- Use of high-quality materials (leather)
- Three heat setting controls
- Extremely lightweight and imperceptible lithium-ion batteries for up to 19 hours of heat
- Very easy access to the charging outlet

SHOE ACCESSORIES

CARE SYSTEM

Your body consumes huge amounts of energy to keep your boots and gloves dry – energy which cannot then be used to keep you warm and maintain your physical strength.

The THERM-IC CARE SYSTEMS are there to help you. With the Therm-ic concepts, your shoes and gloves will dry overnight to prevent your body from unnecessarily wasting energy. The THERM-IC CARE SYSTEMS REFRESHER products also prevent the growth of the bacteria responsible for unpleasant smells. By the morning, the natural freshness of your shoes and gloves will be restored.

CARE  System

SHOE DRYER

Use the Therm-iC Care systems after your sporting activity.

The hygiene devices prevent the development of bacteria and germs while maintaining optimum heat inside the shoes. In just a few hours, ski boots and sports shoes will be dry, heated and ready for use.

REFRESHER

T48-0100-001/002/003/004
EU US UK 12V

- Dries damp shoes or gloves in a few hours
- Prevents the development of germs and bacteria with the UV
- Absorbs unpleasant odours
- Drying time control on the device
- Compact and silent
- Fits all boot types and sizes
- Adjustable length
- USB charging point

WARMERS

EVERYDAY OUTDOOR

POCKETWARMER

(box of 20 pairs)
T31-0200-010

Practical outside, these hand warmers are the perfect companions for all outdoor activities. Simply open the packaging and place the warmers in the pouch. A pleasant heat will be felt in just a few minutes and last for eight hours. The PocketWarmers are packaged in pairs and come in a presentation box of 20.

-  8h
-  EASY TO USE
-  1 PAIR
-  70mm x 95mm

TOEWARMER

(box of 20 pairs)
T31-0100-010

Specially designed for toes, these warmers fit the shape of the foot perfectly. The ToeWarmers are ultra-thin and suitable for any type of outdoor activity. Simply open the packaging and stick the warmers to the socks in the forefoot area. The warmer will begin to heat up very quickly and stay warm for up to six hours. The ToeWarmers are also packaged in pairs and come in a presentation box of 20.

-  6h
-  EASY TO USE
